### PUFF A Unique Temperature

#### Resistance Feature

The PUFF Technology is a unique feature in TUAAARA Water Storage Tanks. It simply maintains the temperature of water for certain period of time. It doesn't increase or decrease the temperature. In a layman's language it acts as Thermos.

The PUFF insulating feature used in TUAAARA Water Storage Tanks greatly lengthens the time over which its water remain hotter or cooler than the Tank's surroundings. The PUFF layer is sandwiched between three layers to make Thermos kind of effect and finally produces five layer puff tank, which prevents heat transfer by any means.

### FEATURES AND BENEFITS

- ▶ Triple Layer & Four Layer
- ▶ 100% Virgin Material
- ▶ Strong, Durable & Attractive Design
- ▶ Uniform Wall Thickness
- ▶ Plumber Friendly
- ▶ Two Sided Inlet & Outlet for Convenience.
- ▶ Threaded Lid
